

My name is Don, and I am currently employed as an engineer for a large oil company based out of Alberta. I worked very hard in University for four years so that I could have a very good job. In my job I help to plan and set up new projects in Fort McMurray. I am always looking for ways to increase the production of oil. My job is very rewarding because I get to help the companies I work with make money.

Facts that help to support my opinion:
